GPUs	(2) NVIDIA RTX A4000, 16GB
Storage	(1) 512GB SSD drive (1) 1TB SSD database drive (2) 20TB video storage drives (RAID 1)
RAID Controller	MegaRAID SAS 9460-16i
Network	(1) 1GbE RJ45 port (2) 10 GbE X550-T2 PCIe card
Power	(1) 950w power supply
Ports	(8) DisplayPort 1.4, (10) USB 3.1 Gen 1, (8) Type A and (2) Type C

Dimensions

Height	20.40"
Width	6.95"
Depth	16.45"

Additional Details

*The Vintra Appliance – Desktop comes pre-loaded with everything needed to operate and is plug and play. It includes a three-year subscription to Vintra Prevent software, including three years of technical support (Silver level). Tested and approved for usage with 10 total streams at 2MP or less with medium scene level density (number of detections per frame) with up to five being used for real-time face recognition. Additional face recognition streams are available, please talk to your Vintra Representative.

Hardware warranty is three years parts-lifetime labor. Repair item must be shipped to an authorized repair center. If a hardware replacement is required, end user may experience loss of alert history and camera configuration. System configurations other than specifically outlined will result in potentials for software and/or hardware failure. Installation by a certified partner is recommended. All Vintra on-premise servers are eligible for updates during the subscription period. Remote support is included with your Silver SLA maintenance plan.
